Lee Plastic promises to deliver superior-quality precision analytical instruments with competitive pricing and a remarkable customer experience.

Quality You Can See

Lee Plastic is a full-service plastic injection molding company supplying the highest-quality, custom-manufactured products to the scientific research, life sciences, bio-tech, and laboratory supply markets. We support concept to delivery and offer services including research & development, prototyping, injection molding, assembly and packaging.

Lee Plastic also manufactures its own OEM product line that consists of disposable universal electroporation cuvettes in both round and square configurations and 12-Channel reagent reservoirs.

Crafted by a committed team of materials experts, our precision instruments are proven to be consistent and dependable across all applications. With exceptional product finishes and clarity, you can expect optimal performance and more reliable outcomes compared other brands.

The difference is clear.
